

Mon Repos Turtle Centre, Bundaberg QLD

# GX Outdoors

# Mon Repos Turtle Centre, Bundaberg QLD

## Client

Mon Repos Conservation Park Located 14km east of Bundaberg along the Woongarra Coast, Mon Repos Conservation Park is a coastal haven renowned globally for nesting marine turtles, particularly loggerheads. The survival of these remarkable creatures relies on the dedication of nature lovers at Mon Repos. The park hosts the Mon Repos Turtle Centre, which is open year-round, offering engaging exhibits on turtle life, conservation efforts, and the challenges they face. Visitors can also witness the nesting and hatching of turtles on guided Turtle Encounter tours from November to March.

## The Problem

A Need for Modernisation and Connection to Turtles - Mon Repos Park's Turtle Centre was in need of a revamp, both in terms of style and functionality, to align with modern architectural trends. The challenge was to enhance outdoor spaces while maintaining a strong connection to the heart and soul of the company - the turtles. The goal was to create a harmonious blend of functionality and aesthetics that would appeal to visitors and showcase Mon Repos commitment to turtle conservation.

## The Solution

The GX Outdoors (previously Grillex) Semi-Customised HYVE Park Seats with Laser Cut Baby Turtles Design - GX Outdoors (previously Grillex), an Australian manufacturer known for its 100% Australian-made aluminum park furniture and commitment to sustainability, was approached to provide a solution. GX Outdoors (previously Grillex), with its mission to enrich lives by bringing customisable outdoor products to public spaces, was the ideal partner for this project.

## The Approach

GX Outdoors (previously Grillex) understood the unique challenge posed by Mon Repos Turtle Centre - to create outdoor spaces that are not only functional but also resonate with the essence of the park, the turtles. The solution lay in the GX Outdoors (previously Grillex) semicustomised HYVE modular park seats. These seats were designed with a laser-cut baby turtle motif, paying homage to the park's iconic inhabitants.

### Key Benefits

**01\_ Aesthetic Integration:** The laser-cut baby turtles on the HYVE modular park seats beautifully integrate the park's theme into the outdoor seating, providing visitors with a visual connection to the turtles and their conservation efforts.

**02\_ Functionality:** The HYVE park seats are not only visually appealing but also provide comfortable and durable seating for visitors, enhancing their overall experience.

**03\_ Sustainability:** The GX Outdoors (previously Grillex) commitment to sustainability aligns with Mon Repos Turtle Centre's ethos, as the seats are made from aluminum, a recyclable and environmentally friendly material.

**04\_ Customisation:** The GX Outdoors (previously Grillex) semi-customisation allowed for a unique design that specifically catered to Mon Repos needs, making the park's outdoor spaces distinctive and inviting.

### Outcome

The installation of the GX Outdoors (previously Grillex) semi-customised HYVE modular park seats with the laser-cut baby turtles design at Mon Repos Turtle Centre has been a resounding success. The outdoor spaces now reflect the park's dedication to turtle conservation while offering visitors a comfortable and inviting place to connect with nature.

GX Outdoors (previously Grillex) collaboration with Mon Repos Turtle Centre exemplifies our commitment to enriching lives and creating the world's best outdoor spaces. By working closely with partners like Mon Repos, we can tailor our products to meet the unique needs of public spaces, creating environments that inspire, educate, and connect people with the outdoors. We look forward to continuing our mission of building sustainable, functional, and aesthetically pleasing outdoor spaces for communities across Australia.
