Northern Rivers Flood Recovery, NSW

Outdoor furniture specialists, GX Outdoors (previously Grillex) have provided the NSW Government support in fitting out the 2022 Flood Recovery Project in Northern NSW.

Client

The Northern Rivers Flood Recovery Project encompassed five sites, Lismore, Coraki, Evans Head, and two locations in Brunswick Heads. These projects were initiated in response to the devastating flooding that occurred in the Northern Rivers area in early 2022. The NSW state government allocated funds for these projects, which were overseen by the NSW Department of Public Works and constructed by Lipman.

The primary objective of these sites was to offer temporary housing solutions to those who had lost their homes in the floods. By providing shelter, the Northern Rivers Flood Recovery Project aimed to assist affected individuals and families in getting back on their feet during this difficult time.

Problem

Lipman faced a challenge in finding a supplier that could offer a complete solution for the open space areas. They needed a company that could supply the complete package of outdoor products as well as provide a reliable and quick delivery service. Finding a supplier who could provide a comprehensive solution was crucial, as it would ensure that the open space areas at each site would be cohesive and meet the specific needs of the residents.

Solution

GX Outdoors (previously Grillex) were able to provide this complete solution to the open space areas starting with the shelters. Given the number of residents at each site, a large covered area was required and our Akora Shelters were a great solution with no limit to the length we can do these in. Some of these sites we supplied as long a 24m long shelters.

Then under these large shelters we supplied wheelchair accessible Atessa Table Settings and Contour BBQs meaning they are completely DDA compliant wheelchair accessible spaces.

In addition to these products, we supplied Atessa Bin Enclosures, Atessa Bench Seats and Citistyle Hoop Bike Racks to complete these spaces.

The Lipman NSW Flood Recovery Facility was built to provide support to communities affected by floods and other natural disasters in New South Wales, Australia. It was created in response to the devastation caused by the floods, which resulted in the loss of many lives and extensive damage to property and infrastructure. The facility was built by the Lipman construction company, which specializes in building infrastructure for government and commercial clients. The Lipman NSW Flood Recovery Facility is a state-of-the-art facility that provides a range of services, including emergency accommodation, food, medical assistance, and counseling to flood victims. It is a testament to the commitment of the Australian government and the private sector to supporting communities in times of crisis.
